PROFILE

A collaborative and detail-oriented Senior Software Developer with 6 years of industry experience in Angular, C#, ReactJs, NextJs, ReactNative and Expo.

Renowned as a proactive team player, I have consistently facilitated meetings with my teammates to help elevate performance by sharing insights on how best to tackle technical problems. My approach to software development centers around teamwork and open communication, fostering an environment where feedback and constructive criticism are welcomed. This has enabled me to effectively lead and support my team through challenging projects, ensuring both business objectives and client satisfaction are met.

PROFESSIONAL EXPERIENCE

June 2024 – present

Moonward, Frontend Developer

- Developed applications leveraging ReactJs, NextJs, ReactNative, and Expo.
- Leveraging highly performant caching and state-management software such as Tanstack and Zustand.
- Collaborated with teammates to create highly reusable UI components, streamlining efficiency and greatly improving Developer Experience.
- Regularly presented application progress to clients, gathering feedback and aligning project goals.

February 2023 – January 2024

AMCS Group, Senior Software Developer specializing in Angular

- Designed and developed various features with rich user interactivity centered around Maps using Leaflet.Js and AG Grid. Resulted in significantly enhanced user interaction and advanced application usability.
- Conceptualized and authored reusable and maintainable Angular Components, Services, and Directives resulting in reusability for core components across new features.
- Expanded and coordinated Test Driven Development in Angular and .Net using Jasmine, Gherkin, and SpecFlow. This led to an increase in Unit and Integration test cases for new features and fixes.

- Collaborated heavily with teammates on code design and maintainability streamlining updates and fixes due to the rehabilitated coding structure.
- Explored and refactored Angular RxJs logic within various components and services diminishing potential memory leaks and improving maintainability within the application.

July 2021 – February 2023

CoDev, Full Stack C# and Angular Developer

- Boosted startup efficiency by 25% in the user-facing application through strategic optimization of Angular NgRx store and RxJs.
- Collaborated with the CTO and Senior Architect in creativity, design, and execution to deliver a suite of sustainable user-centric features employing Angular, .Net Core, and Entity Framework Core migrations.
- Implemented client-side image caching enhancements in Angular, slashing loading times by 60%.
- Revamped the UI/UX of legacy features by integrating SCSS, bringing modernity and improved user experience.

April 2019 – July 2021

Accenture, Application Developer

- Led and produced Azure Logic Apps to offload heavy tasks from our service, leading to a significant performance boost.
- Initiated and maintained our GIT branching strategy and Continuous Integration (CI)/Continuous Development (CD) in Azure DevOps, increasing our release efficiency.
- Led the team in optimizing various features due to the increase in users, which reduced loading times to 83%.
- Created an Error-handling implementation in our ASP.Net APIs that reduced duplicate code throughout our service by up to 40%.

April 2018 – April 2019

Vertere, Inc, Application Developer

- Spearheaded and maintained several Azure Cloud Services and Azure DevOps such as production AppServices, SendGrid, Azure Slot Deployment, GIT in DevOps.
- Composed several robust and maintainable features in ASP.Net, AngularJs, and T-SQL that helped employees and project managers deal with their onboarding/offboarding more efficiently.
- Initiated and implemented various architecture optimizations, and security enhancements to follow industry-standard principles like SOLID and DRY.

SELF EMPLOYMENT / UPWORK

January 2024 – present

Senior Software Developer with Angular and .Net specialization,
100% Job Success Score

- Leveraging extensive technical experience to deliver high-quality solutions within tight deadlines while addressing ambiguous business problems.
- Effective communication with clients, technical leads, and teams to understand their concerns and objectives, while providing technical consultation to alleviate growing pains.
- Garnering positive reviews and testimonials on Upwork, highlighting my work ethic, professionalism, and reliability.

INDEPENDENT PROJECTS

May 2023 – present

Mom and Me Clinic
A Website for a local clinic "Mom and Me Clinic". The website aims to showcase the clinic's Doctors, Services, and Location and provide a way to request an appointment within the site. Mobile-first approach and built using NextJs, Tailwind CSS, and React Email. Deployed with CI/CD using Github and Netlify.

February 2023 – September 2023

SanicaSwim
A simple order form website for a local brand "SanicaSwim". Mobile-first approach and built with NextJs, Tailwind CSS, and CI/CD with GitHub and Netlify. Integrates with Notion API to track and notify the client of new orders via Slack.

SanicaSwim GitHub Repo

August 2022 – November 2022

VSCode Markdown Snippets for MDX and Docusaurus
Published in VS Marketplace , The extension provides snippets for MDX like: front-matter, front-matter authors, react import/export, codeblocks, admonitions, etc.

August 2022 – January 2023

RobinDalmy Blog using Docusaurus
A simple blog site created to test out Docusarus. Deployed with CI/CD using Github and Netlify

RobinDalmy Blog Github Repo

SKILLS

Next JS • ReactNative • Expo • GitHub & Git • Angular • .Net Core • Entity Framework • T-SQL • Azure • Tailwind CSS • SCSS • Angular Jasmine Tests • Gherkin and Specflow • YAML • Tanstack

EDUCATION

2014 – 2018
Cebu, Philippines

University of San Carlos,
Bachelor of Science in Information Technology

TAFE Southbank, Certificate III in Web Development

CERTIFICATES

- Azure Fundamentals (AZ-900)
